BUREAU VERITAS Certification

Energy consulting – Energy Labeling

Energy advice and energy labeling, as well as the implementation of energy-saving measures for electricity, water and heat, have been one of our primary core benefits from the start of the company. Since 1997, we have been approved as energy consultants for both single- and multi-family houses, multi-storey dwellings as well as commercial and public construction.

Hillerød, Varde, Guldborgsund, Langeland, Sorø Frederiksund, Gentofte and Vesthimmerland municipalities, as well as KAB Ejendomsadministration and several private and public housing companies have chosen Damgaard Engineering Consultants to carry out the statutory energy labeling of public and private properties.

Damgaard Engineering Consultants has extensive experience in involving users, residents, and employees as well as representatives from the client's building and operations department, etc.

Damgaard Consulting Engineers is certified, by Bureau Veritas, as an energy labeling company.
